

# Six Steps, First Power

The simple alternative to conventional wind installs.

## STEP 1: LOCATION

## STEP 2: SCREW PILE INSTALL

A STEEL SCREW PILE IS DRIVEN INTO THE GROUND, ELIMINATING CONCRETE AND CURING DELAYS.

## STEP 3: BASE PLATE MOUNTING

THE PREFABRICATED PLATE BOLTS ONTO THE PILE, LEVELED AND TORQUED IN HOURS, READY FOR THE TOWER.

## STEP 4: TOWER BASE INSTALL

THE TILT-UP BASE HINGE IS INSTALLED, ALLOWING THE FULL STRUCTURE TO BE ASSEMBLED SAFELY AT GROUND LEVEL.

## STEP 5: VAWT ASSEMBLY

BLADES, HUB, AND GENERATOR ARE BUILT AT ARM'S REACH FOR SAFER, FASTER ASSEMBLY.

## STEP 6: TOWER RAISE & COMMISSIONING

A SINGLE LIFT WITH A WINCH OR HYDRAULIC RAM BRINGS THE TURBINE UPRIGHT, LOCKED, AND READY FOR FIRST POWER THE SAME DAY.

ENERGY WHERE YOU NEED IT, **WHEN YOU NEED IT**
